Michael Wood   CSC 351   HW2

Problem 1

Converting the ER model on canvas to its
equivalent relational model,

Salesman (ID, Name)
Client (CID, Phone, Name, Address)
Car (License, Year, Model, Value, Manufacturer)
Buys (ID, CID, License, Date)
Mechanic (MID, Address, Name)
Repair Job (License, MID, Number, Description, Cost)

Repairs and Does are reduntant because they are
identifying relationships.
